

How to create your own Snapchat geofilter

A Hootsuite Checklist

[Log in to Snapchat here](#)
and follow the steps below.

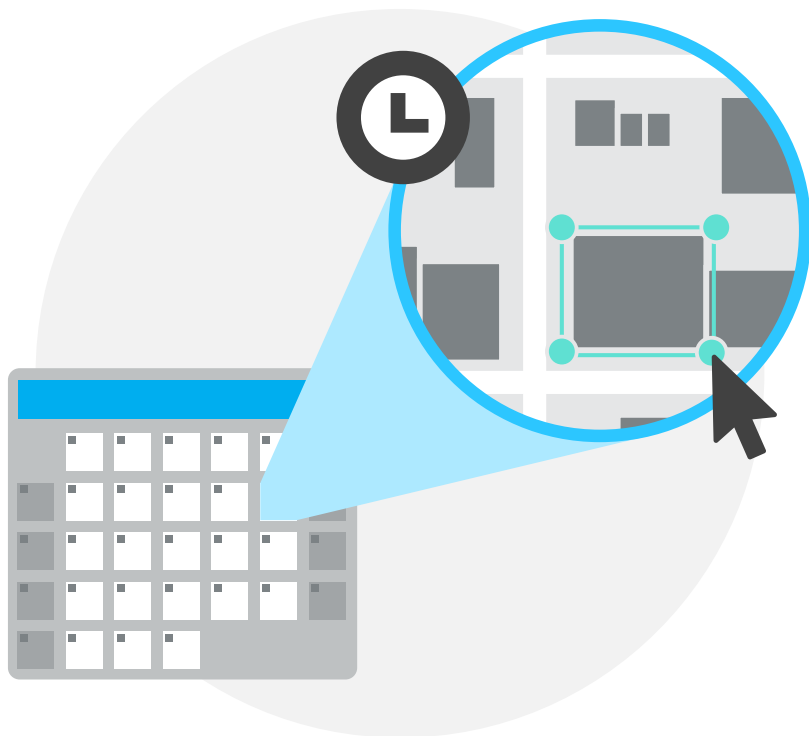

STEP 1

Design it

Design your own geofilter in Photoshop. Or use Snapchat's templates.

Things to remember:

- ❗ Files must be saved as .PNG with a transparent background (this ensures other users' Snaps show up underneath your geofilter).
- ❌ Don't use logos or trademarks that you don't own.
- ❌ No photographs of people.
- ❌ No URLs, phone numbers, or emails.
- ❌ No drug-related content.
- ❗ Snapchat has restrictions for the size of your image file.

STEP 2

Choose location & time

Select the local area you want to target. Pick a time for your geofilter to go live.

Things to remember:

- [Log in to Snapchat](#) and pick the date and length you want your geofilter to be active. The longer you pick, the more you pay.
- It takes up to one day to get your geofilter approved. Planning a live event? Submit for approval two to three days in advance to be safe.
- Click “Draw Fence” and click the Google Map to select points and draw a shape around your chosen area.

STEP 3

Buy it

1. Pricing starts at \$5.
2. Submit your design for review.
3. Snapchat will review within one business day.
4. Once approved, your geofilter will be live for the time and location you selected.

STEP 4

Check your results

- See how many people viewed or snapped your geofilter by [logging in here](#).
- Click your name in the upper right corner and select 'Insights.'

Some ways to use Snapchat geofilters:

At a college campus

Give students a fun way to show their school pride at a campus event.

At a local store

Target a busy street near your store, helping new customers discover you.

At a conference

Give customers an exclusive geofilter to use at your launch or conference.

Every social media template you need

Hootsuite's Social Media Essentials Series gives you all the tools you need to nail the fundamentals of social media.
